Contents

NUMBER 1

1 The thermal evolution of lithosphere extending on a low-angle detachment zone *Herman Voorhoeve and Greg Houseman*

11 Global eustacy and the Eocene sequence in the Hampshire Basin, England *A. G. Plint*

23 The Cenozoic and Late Cretaceous evolution of the Indian Ocean Basin: uncertainties in the reconstructed positions of the Indian, African and Antarctic plates *Peter Molnar, Federico Pardo-Casas and Joann Stock*

41 The nature and evolution of deep-sea channel systems *R. M. Carter*

55 Listric extensional fault systems – results of analogue model experiments *P. G. Ellis and K. R. McClay*

NUMBER 2

71 Along-strike variations in foreland basin evolution: possible evidence for continental collision along an irregular margin *Gary G. Lash*

81 Basin architecture and thermal maturation in the strike-slip Deer Lake Basin, Carboniferous of Newfoundland *Richard S. Hyde, Hugh G. Miller, Richard N. Hiscott and James A. Wright*

107 Basement controls upon basin development in the Caledonian foreland, NW Scotland *Alan M. Stein*

NUMBER 3

121 Rates of active deformation in the Aegean Sea and surrounding areas *James Jackson and Dan McKenzie*

129 Structural development of Neogene basins in western Greece *M. Brooks, J. E. Clews, N. S. Melis and J. R. Underhill*

139 Normal fault zone evolution and fault scarp degradation in the Aegean region *Iain S. Stewart and Paul L. Hancock*

155 Syn-sedimentary structural controls on basin deformation in the Gulf of Corinth, Greece *Bill Higgs*

167 A comparative study of neotectonic basins across the Hellenic arc: the Messiniakos, Argolikos, Saronikos and Southern Evoikos Gulfs *D. Papanikolaou, V. Lykousis, G. Chronis and P. Pavlakis*

177 The Corinth-Patras rift as the initial stage of continental fragmentation behind an active island arc (Greece) *Theodor Doutsos, Nikolaos Kontopoulos and Georgios Poulimenos*

NUMBER 4

191 Mid-Jurassic through mid-Cretaceous extension in the Central Graben of the North Sea – part 1: estimates from subsidence *Steven J. Hellinger, John G. Sclater and John Giltner*

201 Mid-Jurassic through Mid-Cretaceous extension in the Central Graben of the North Sea – part 2: estimates from faulting observed on a seismic reflection line *John G. Sclater and Mark D. Shorey*

217 Errors in extension measurements from planar faults observed on seismic reflection lines *John G. Sclater and Bernard Celerier*

223 Scientific applications of downhole measurements in the ocean basins *Paul F. Worthington, Roger N. Anderson, Richard D. Jarrard, Keir Becker, J. Sebastian Bell, Matthew H. Salisbury and Ralph A. Stephen*

237 Compaction-induced subsidence in the margin of a carbonate platform *C. Doglioni and R. K. Goldhammer*

247 Reconstructing basin evolution from sedimentary thickness; the importance of palaeobathymetric control, with reference to the North Sea *G. T. Bertram and N. J. Milton*

259 Book review
